SSL MELODY 1 LIFTING PLATFORM

When faced with a wheelchair access problem into or within a public building, ramping is often not feasible due to the length required to achieve the recommended gradient.

The Melody 1 is an open-plan (no shaft required) lifting platform designed to overcome just this problem and is available in various models to suit lifting heights up to a maximum of 1 metre.

Versatile - suited to either outdoor or indoor applications, the design incorporates an integral ramp to eliminate the need for a pit, thus keeping building work to a minimum

Aesthetically pleasing & unobtrusive - the standard finish is maintenance free stainless steel but other materials or paint finishes are available to suit the surrounding decor

Free standing - a major feature of the design is the lack of mast or support tower, minimising aesthetic intrusion into the environment

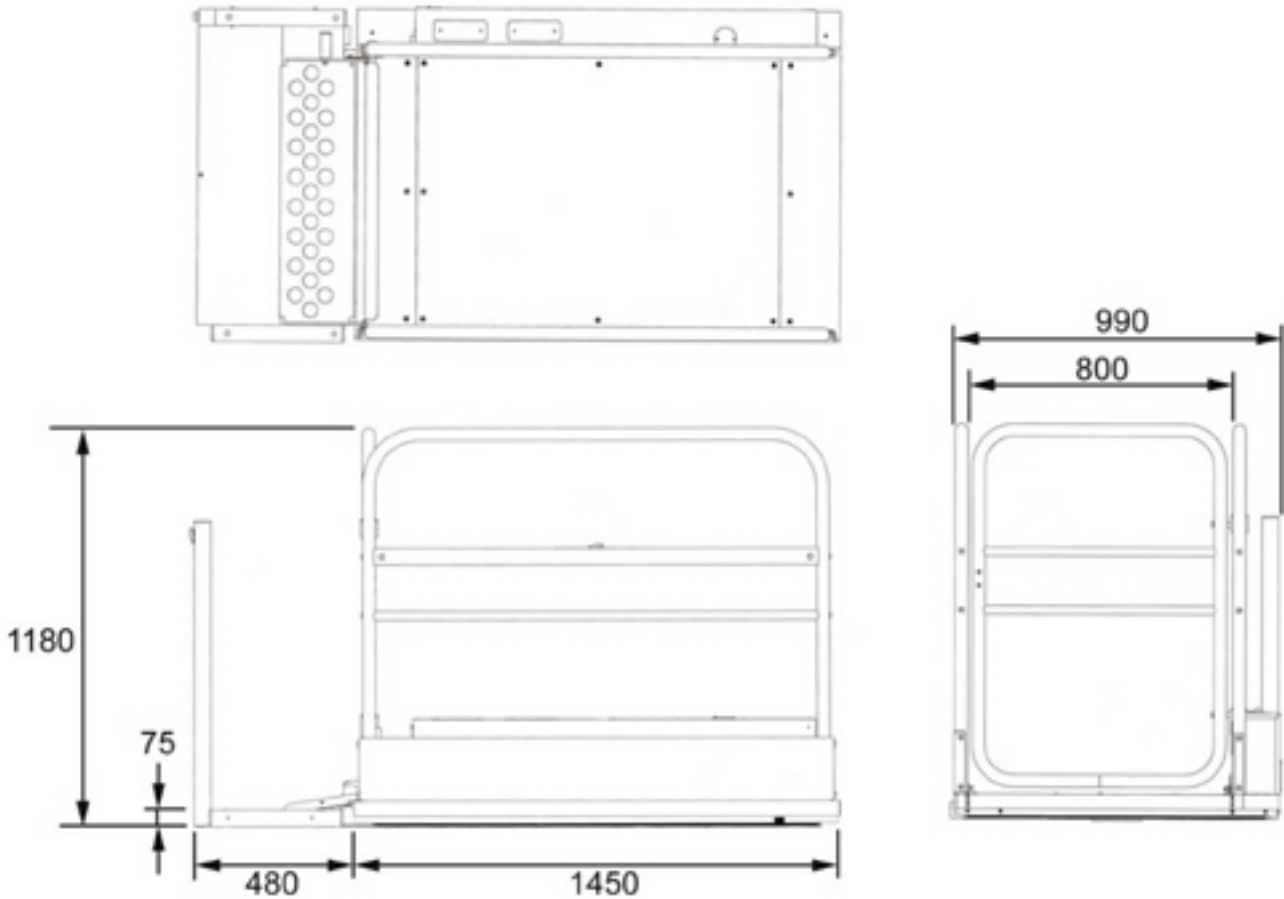

Easy to use - convenient controls and shallow approach ramp

Reliable - battery back-up provides normal operation (up to 30 cycles) in case of power cut. State of the art hydraulic system providing smooth, quiet operation

Safe - built in the UK to BS 6440 by a Company with over 30 years' experience in access products for disabled

DIMENSIONAL OUTLINE AND DATA

<p>CAPACITY: MAXIMUM HEIGHT SERVED: MEANS OF OPERATION: POWER SUPPLY:</p> <p>SAFETY EQUIPMENT:</p> <p>INTERNAL PLATFORM DIMENSIONS: DESIGNED IN COMPLIANCE WITH:</p>	<p>250kg 1000mm 24v hydraulic scissor drive, battery operation 220/240V AC~50/60 Hz No dedicated supply or RCD required Full platform safe edge which stops the lift should it touch an obstacle</p> <p>800mm x 1400mm (standard) BS 6440 CE compliance</p>
